EDUCATION AND CERTIFICATION

Grand Valley State University – Allendale, MI — Expected Graduation: May 2027
Master of Science – Data Science and Analytics — GPA: 3.96

Elizabeth City State University – Elizabeth City, NC — Dec 2023
Bachelor of Science – Computer Science (Data Science Track) | Mathematics Minor — Summa Cum Laude

Google Data Analytics Professional Certification — Aug 2023

WORK EXPERIENCE

Data Analysis Intern — Oct 2026 – Present
World Bank Group – Women, Business and the Law Unit — Washington D.C. (Remote)

- Support the integration, cleaning, and standardization of large, multi-source datasets using Python and Excel, developing automated quality controls and API-ready JSON outputs.
- Analyze policy and legal indicators across 190 economies, translating insights into interactive Tableau dashboards, visualizations, and actionable reports on women's economic inclusion.
- Contribute to the development and testing of an AI platform for research and automation, incorporating prompt engineering, model performance monitoring, and safeguards for accuracy, bias, and reproducibility.

Strategic Planning, Assessment and Accreditation Graduate Assistant — Aug 2025 – May 2026; Aug 2026 – Present
Grand Valley State University – Office of the Provost — Allendale, MI

- Analyze assessment and accreditation records, and conduct research to update institutional data across Excel and web-based systems, improving data quality and supporting decision-making on student learning outcomes and strategic planning.
- Built an AI-powered document management web app leveraging LLM and full-text analysis APIs to automate processing, classify, tag, store, and retrieve accreditation files, enabling cloud-based multi-user collaboration, improving organization.
- Collaborate with University Assessment Committee on database management, documentation and website administration.

Graduate Research and Teaching Assistant — Jan – May 2025
Elizabeth City State University – Department of Mathematics and Computer Science — Elizabeth City, NC

- Collaborated with professors to develop and implement machine learning models and dimensionality-reduction pipelines for high-dimensional datasets in Python; conducted research to improve accuracy of existing departmental algorithms.
- Conducted tutoring sessions and graded assignments and examinations for undergraduate computing and programming courses, supporting faculty with course assessment and providing consistent evaluation and feedback on student work.

Data Analyst — Apr 2024 – Jan 2025
Therapeutic Innovations Inc. — Worcester, MA

- Designed SQL-based ETL pipelines that automated extraction, cleaning, and consolidation of fragmented hospital records from Africa and India, improving operational efficiency and data quality for market-entry analysis and business reporting.
- Developed a lead-scoring model from hospital infrastructure and purchasing-capacity data, enabling the identification of high-potential clinical partners for low-cost essential medical equipment.

SKILLS

Python, R, SQL, Excel, Java, Codex, Git & GitHub, RAG, Docker, Azure Databricks, Statistical Modeling, Data Governance, Prompt Engineering, AI-Assisted Development, Market Research, Technical Documentation, Adaptability, Problem Solving, Communication, Proactivity, Attention to Detail, Presentations, Intellectual Curiosity, Initiative, Stakeholder Engagement

PROJECTS AND ACTIVITIES

Co-Founder and Product Lead – Sender+ Courier (Tech-Enabled Logistics Startup) — Aug 2025 – Present

- Spearheading the build of a full-stack courier system, supporting package intake, pickup coordination, delivery tracking.
- Semi-finalist in Grand Rapids DeepTech 2025 Pitch after deploying an MVP built on React/Django full-stack architecture.

Gun Violence and Socioeconomic Data Analysis Project — Feb – May 2026

- Integrated and analyzed U.S. Census and Gun Violence Archive datasets in R using Tidyverse (including dplyr, stringr, and ggplot2) to identify socioeconomic patterns associated with firearm violence through statistical analysis and visualization.

Guest Data Analysis Consultant – American Statistical Association, DataFest 2026 — Mar 27 – 29, 2026

- Advised nine undergrad teams from multiple universities on dataset interpretation, Python-based cleaning and analytical strategy, helping contestants navigate conceptual hurdles while preserving competition rules against direct coding support.

Volunteer Data Science Intern – Important Gifts Inc. DBA **Changing the Present** — Apr – Dec 2024

- Developed Python web-scraping workflows using BeautifulSoup and Scrapy to extract and transform unstructured web data, implementing data-cleaning procedures to improve dataset quality and support downstream analysis.

Business Growth Analytics for Bellabeat Fitness Company

- Conducted exploratory and statistical analysis of business and customer data in R using the Tidyverse, ggplot2, and Janitor to generate data-driven recommendations supporting strategic growth decisions.

Strategic Business Development Extern – The Home Depot — Feb – Apr 2023

- Researched emerging market disruptors and innovative trends in the home improvement industry, delivering findings and investment insights as one of only 5% of externs selected to present to the global Strategic Business Development team.
